

## PRODUCT BULLETIN

# 365 Windshield Washer Fluid

PRODUCT # 448

**CAM 2 365 Windshield Washer Fluid** is a premium, ready to use washer fluid that applies a technologically advanced invisible film on glass surfaces which promotes rapid beading for greater year-round visibility. This advanced formula has excellent streak-free cleaning power to remove tough road films such as road grime, bug splatter, salt, mud, soil, and grease.

**CAM 2 365 Windshield Washer Fluid** provides a 365 day solution which eliminates the need for seasonal change outs. **CAM2 365** contains an alcohol that cuts through ice and snow while also acting as a co-solvent for cleaning. The rapid evaporation rate of methanol promotes fast, streak-free drying for improved visibility.

Most windshield washer fluids which promote rapid water roll-off leave behind films after drying which can impair visibility and actually attract dirt and grime build-up. **CAM 2 365** does not include polymeric additives that form thick films to achieve water sheeting. The all-new thin film technology found in 365 was developed after many hours of both laboratory and field trials to ensure a long-lasting, streak-free appearance which will not wash away under normal rinsing. These long-lasting effects make CAM 2 365 more economical than competing brands needing less applications to achieve the same performance level.

**WARNING:** This product contains methyl alcohol and cannot be made non-poisonous.

## FEATURES/BENEFITS

- ✓ Protects to 0°F providing a year-round solution in most climates
- ✓ Powerful cleaning action easily removes greasy road grime, bug splatter, mud, and tar fast
- ✓ Thin-film technology repels rain, sleet, snow, and dirt from accumulating on surfaces
- ✓ Provides clear, streak-free performance
- ✓ Ready-to-use formula for added convenience

## DIRECTIONS FOR USE

- Fill windshield washer reservoir with CAM 2 365 Windshield Washer Fluid without diluting product
- Do NOT overfill

## 365 Windshield Washer Fluid

PRODUCT # 448

**Cam2 365 Windshield Washer Fluid** is the result of many hours of laboratory and field trials to find the perfect balance between cleaning power and rapid water beading. Surfactants are employed to promote water beading, but if care isn't taken in selecting or if used at too high of a concentration, surfactants may also promote sudding during dispensing leaving behind opaque, white streaking which can severely limit visibility. As seen here, **365 Windshield Washer Fluid** promotes superior beading over leading competitors. The surfactant used in **CAM2 365** forms a tighter micelle around water droplets encapsulating more water per volume providing a clearer field of vision.

CAM2 365 (above) provides superior beading than competing brands (right) providing a clearer, safer driving experience.

### TYPICAL CHARACTERISTICS

CAM2 365 WWF	
Color	Orange
Active Ingredient	Methanol
% Active	24
Freeze Point, °F	0°
Foam Test	Pass

**⚠WARNING:** This product can expose you to chemicals including Methyl Alcohol, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).
