

PRODUCT BULLETIN

Blue Blood Elite 4T V-Twin Synthetic Blend Motorcycle Oil

Product # 966, 967

CAM2 Blue Blood Elite 4T Motorcycle Oil with DETOX Technology is a blend of premium synthetic and conventional basestocks with thermally stable friction modifiers designed for use in liquid and air-cooled V-Twin motorcycle engines operating under severe operating conditions. The combination of synthetic and conventional base stocks provide superior high and low temperature protection and resists viscosity breakdown in highly stressed, high RPM performance engines and transmissions.

CAM2 Blue Blood Elite 4T Motorcycle formulations offer excellent flow characteristics at low temperatures to help reduce engine wear at start-up, and provide outstanding resistance to oxidation and/or volatilization at high temperatures, both of which degrade the oil. Each of the CAM2 motorcycle products have been optimized to meet the unique performance characteristics demanded by motorcycle engines and thus provide an extremely high level of performance and protection for motorcycle engines.

CAM2 Blue Blood Elite 4T Motorcycle Oils are advanced performance synthetic blend motorcycle oils. The unique structure of CAM2 Motorcycle formulations enables them to offer advantages beyond conventional motorcycle oils of similar viscosities. For example, base oils become lighter in viscosity as temperature increase. This characteristic forces manufacturers of oils to use thickeners which will help the oil maintain its viscosity as the temperature increase. These thickeners, however, can shear down and lose their thickening capacity in an operating engine or transmission. Synthetic fluids do not require as much thickener to achieve a multi-grade viscosity rating and, in some cases, do not require any thickener. As a result, synthetic formulations tend to be very shear stable and thus, provide a solid, protective oil film for engine bearings, piston rings, transmission gears and other critical engine parts.

The fast acting **DETOX Additive** included in CAM2 Blue Blood Elite motorcycle oils contain a unique detergent and dispersant combination that targets contaminants providing superior engine cleanliness to maximize and maintain peak engine performance. It provides outstanding wet clutch protection for maximum power transfer and smooth shifting even at high RPMs.

FEATURES

- Enhanced lubricity to help maintain maximum power transfer
- Robust friction modifiers to meet JASO MA2 specifications
- Maximum shear stability to help resist viscosity shear down in high performance engine and transmissions
- Excellent thermal stability to help resist oxidation and high-temperature degradation
- Optimized wet-clutch performance
- Excellent low temperature flow characteristics to help minimize engine wear during start-up
- Suitable in central or dedicated lubrication systems
- Surface-active chemistry aggressively attaches to engine surfaces and keeps them clean

APPLICATIONS

CAM2 Blue Blood Elite 4T Motorcycle Oils have displayed acceptable performance for use where the following specifications are required:

Harley Davidson V-Twin Motorcycles

API SL, SJ, SH, and SG

API CF (20W-50)

JASO (T903) MA2

PRODUCT BULLETIN

Blue Blood Elite 4T V-Twin Synthetic Blend Motorcycle Oil

Product # 966, 967

TYPICAL PROPERTIES

SAE GRADE	10W-40	20W-50
Product Code	966	967
Viscosity @ 40°C, cSt	94.07	151.3
Viscosity @ 100°C, cSt	14.34	18.2
Viscosity Index	158	135
Flash Point: °C	238	243
Pour Point: °C	-41	-38
Dynamic Friction Index	2.1	2.2
Static Friction Index	2.0	2.1
Stop Time Index	2.1	2.3

Results are typical characteristics, small variations may occur during future production operations.
