

CAM2® Magnum® Gear Oils GL-1

CAM2® MAGNUM® GEAR OILS are manufactured from high quality base stocks. These oils are fortified with defoamers and rust and oxidation inhibitors for lasting trouble-free and sludge-free performance. MAGNUM® Gear Oils meet API GL-1 as well as AGMA R & O service classifications where low to moderate loading at moderate to high temperatures are encountered.

CAM2® Industrial EP Gear Oil

CAM2® Industrial EP Gear Oils are premium quality, extreme pressure gear oils for use in industrial service. These lubricants have good oxidation and thermal stability, are noncorrosive to gear and bearing materials, provide excellent rust protection, and resist oil thickening and deterioration for long service life. Excellent demulsibility and non-foaming.

CAM2® SYNAVEX™ Full Synthetic Gear Oil LS

GL-5

CAM2® SYNAVEX™ FULL SYNTHETIC GEAR OILS (LS) are full synthetic heavy duty extreme pressure multi-grade gear oils manufactured with the highest quality synthetic base oil. Premium quality CAM2® SYNAVEX™ Gear Lubricants (LS), through the combination of naturally high viscosity index (low pour) synthetic base oils and advanced additive technology, are more economical than oils of lesser quality and lower initial cost. Using CAM2® SYNAVEX™ Gear Lubricants (LS) may allow longer drain intervals, extended equipment life, and a significant reduction in maintenance cost and downtime.

CAM2® High Performance EP Gear Oil GL-5

CAM2® GEAR OILS are premium quality gear oils blended from highly refined high Viscosity Index base stocks. Premium quality CAM2® Gear Oils, through the combination of highly refined base oils and advanced additive technology, are more economical than oils of lesser quality and lower initial cost. Equipment life may be longer and more trouble-free, and maintenance cost and downtime may be significantly reduced through the use of CAM2® Gear Oils in conjunction with a dedicated preventive maintenance program.

CAM2® Gear Oil GL-1

CAM2® GL-1 GEAR OIL is a straight mineral gear oils intended for mild service in a broad range of automotive, manual transmission and industrial gear and bearing applications calling for API GL-1 performance. CAM2® SAE 90 GL-1 Gear Oil is used in gear sets operating under such mild conditions of low unit pressures and minimum sliding velocities, that untreated oil may be used satisfactorily. They may contain oxidation, rust and corrosion inhibitors, anti-foam agents and pour point depressants. GL-1 gear oils do not contain friction modifiers or extreme pressure additives
