### CAM2® Blue Blood Full Synthetic Racing Oil

CAM2®'s legendary, yet revolutionary, high zinc formula Blue Blood Racing Oils are designed to provide enhanced racing performance and unsurpassed wear protection in today's high-revving, heavy-load competition engines.

- High zinc levels for excellent anti-wear protection
- Excellent oxidation stability in high performance engines
- Full Synthetic 0W-30: Formulated with thermally stable synthetic base stocks and additional friction modifiers to deliver the maximum obtainable horsepower. Blue Blood is especially designed to resist thermal breakdown and can be used with a wide variety of competition fuels.
- 20W-50: Formulated in combination with synthetic base oil to provide enhanced protection at high and low temperature extremes.
- "Nitro" SAE 70: Formulated for gas, alcohol and nitro-methane fueled racing engines that experience extreme load and high temperature conditions. The high viscosity of the oil allows for excessive dumping of fuel "blow by" into the racing oil while maintaining critical protection cycle engines.
